

Prolonged Exposure Workshop Training Description

Target Audience: Mental health providers who treat military personnel and veterans with PTSD.

Instructional Level: Introductory

Course Description: The STRONG STAR Training Initiative offers a two-day workshop in Prolonged Exposure Therapy (PE). PE for PTSD is one of the most effective treatments for PTSD, with the largest empirical data over the past few decades. There are four main treatment components in PE: 1) Repeated in vivo exposure to situations the client is avoiding because of trauma-related fear; 2) Prolonged (repeated) revisiting of the trauma memories followed by processing where the therapist and client discuss the traumatic experience and consider and related unhelpful, erroneous thoughts; 3) Education about common reactions to trauma; and 4) Breathing retraining, i.e., teaching the client how to breath in a calm way.

Learning Objectives:

At the end of this course, participants will be able to:

1. Discuss current and foundational research that evaluates the empirical support for PE as an effective treatment for posttraumatic stress disorder (PTSD).
2. Identify appropriate cases for PE based on thorough trauma interview to assess information about the patient's trauma history.
3. Describe the treatment rationale for PE to patients.
4. Select, administer, analyze, and incorporate findings of at least 2 assessment/treatment outcome measures.
5. Explain the diagnostic criteria for PTSD according to the DSM-5
6. Collaborate with patients to identify and create in-vivo exposure plans and an in-vivo hierarchy.
7. Demonstrate and analyze imaginal exposure practices with PE patients.

8. Identify 2 techniques to address a patient's anger, guilt, and shame in the context of PE treatment.
9. Identify and address 2 factors that impair effective emotional engagement in PE.
10. Identify 2 risk factors for secondary traumatic stress and implement strategies to improve therapist self-care

Primary Goal: After completion of this training, mental health providers will be able to implement PE effectively.

Date and Time: Thursday and Friday January 26-27, 2023, from 9 a.m. to 5:00 p.m. CST.

Duration: 2-day workshop

Where: Zoom

Training Cost: \$300 for eligible providers
